

green school project™

Dear Parents of

Did you know that the plastic in everyday items like printer cartridges and cell phones takes over ten centuries to decompose? Did you also know that around 1.5 million of these cartridges go into landfills each month, destined to stay there for over 1,000 years? It's sad but true, especially considering that these plastics are valuable recyclables that we can make extra money from!

Our school is now participating in GreenSchoolProject, a program that simultaneously reduces the waste heading to our community's landfills, all the while providing our school extra funding. The way it works is simple: just send your child(ren) to school with any used printer cartridges or old cell phones that you might come across, and we'll send those items to GreenSchoolProject to be recycled. Once they receive and process our shipment, they'll send us a check for our efforts in recycling, all this, at no cost to our school. It's a win-win situation!

You can help our school by not only keeping an eye out for recyclables in your own home, but at work as well. It doesn't matter where the items come from as long as we get them! If you'd like to see more about GreenSchoolProject on your own, including a list of acceptable cartridges and phones, you may visit www.greenschoolproject.com.

Thanks in advance for your help! Our school and the environment appreciate it!

Best,

green school project
