

Dear Parents,

We worked hard in class today to set up a recycling collection center in our classroom to help the environment. We discussed how a variety of items end up in landfills that could actually be recycled. You can help us keep the earth beautiful by sending in used inkjet and laser printer cartridges as well as cell phones that would otherwise be thrown away. We can send these items off to Green School Project and they will recycle these objects and pay us for them! What a great way to take care of the earth and earn money for our school. To help us raise even more money you can send in cartridges used at your place of work. Green School Project accepts and pays for all undamaged cartridges and cell phones.

Thanks for helping us learn the importance of recycling and raise money for our school at the same time.

Sincerely,
