

Name : _____

7-12 - Lesson Plan #2

Recycling Research

Use the following questions to help guide your research on your chosen recyclable material or object. Use note cards to record your responses and organize your information.

1. What objects are made with your material or how is this object used?
2. From where does this material or object originate?
3. How much of this item is produced and/or used in any given period of time.
4. How are these items typically disposed?
5. Where do the items go to be recycled?
6. What are the steps involved in recycling the object/material?
7. How does recycling this material benefit the environment?
8. Cite the resources used in gathering the above information.
